Health & Safety Hazards

Food Safety

Wash and dry hands **after** performing this task

Ensure nuts, bolts & screws are tight

Inspect equipment. Do not use if damaged

Check for the Following

- 1 Suction hose should be visually checked for splits or tears. Hose should be changed if unserviceable
- 2 Pump handle should be checked for smooth rotation. Any severe grinding may indicate worn Vanes. Contact your [Service Company](#) to replace pump or pump components
- 3 Pump body should be visually checked for leaks. Any leaks found, contact your [Service Company](#)
- 4 All screws are present and secure (external surfaces)
- 5 Hinges are working correctly and clip is securely fitting
- 6 Pivot Pin is present and working correctly; lifts and locks, pump hose assembly into all 3 locking positions
