Health & Safety Hazards

Food Safety

Wash and dry hands **before** and **after** performing this task

Ensure nuts, bolts & screws are tight

Inspect equipment. Do not use if damaged

EQUIPMENT

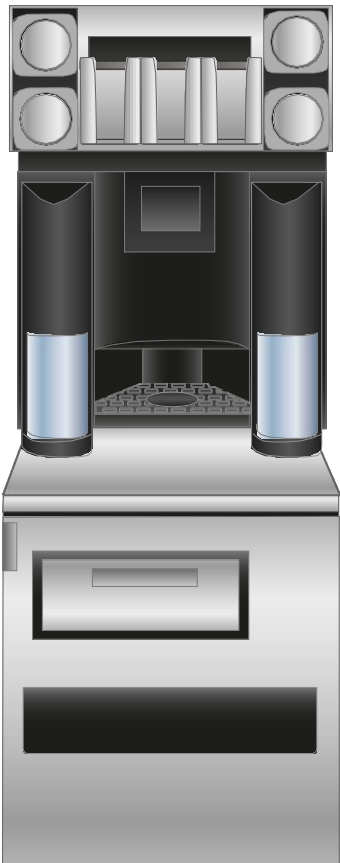

Scales

LARGE
product cup

Important:

Calibrate the unit 24 hours after the Zone 2 (weekly) cleaning

1

From the main menu select the **Manager** icon.
Enter the manager's password (A).

2

Select **configure slots**.

3

Select **calibrate flavour**.

4

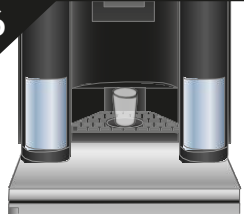

Select the product **flavour, water** or **ice** to calibrate.

5

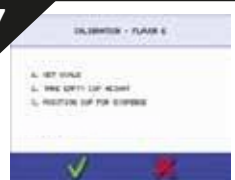

Get scale. Take cup weight and TARE (zero) the scale.

6

Position the **LARGE** cup ready for dispense.

7

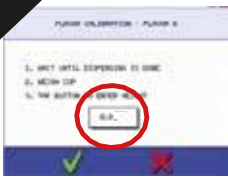

Press **green tick** to begin dispense of a set product volume. Wait until dispensing is done.

8

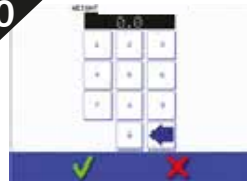

Weigh cup to determine actual product weight.

9

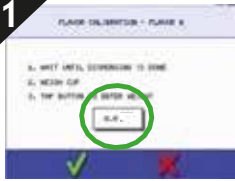

Tap button to enter actual dispense weight (grams).

10

Enter the product weight (grams) to one decimal place. Select the **green tick**.

11

The calibration screen will return, confirm the weight entered is correct. Press the **green tick** to continue.

12

Calibration complete. The machine will automatically recalculate the correct dispense weight. Press the **green tick**.

13

Calibration Targets

Product = 113g (+/-6g)
Ice = 170g (+/-14g)

If the actual product weight of the calibrated product was outside the above tolerance levels, repeat the calibration process for this item (step 4). This may take up to three attempts.

NOTE: You can re-use a partially full cup of product, but ensure you 'zero' the scale. When calibrating ice, the cup should be emptied for each calibration.

14

The calibration screen returns. Chose another **flavour, water** or **ice** to calibrate another item (return to step 4). Alternatively press the **red cross** to return to the Configure Slots screen, then press the **return key** twice to go back to the Main Menu.
