Shurflo System

Estimated Time to Complete

25 Minutes

Health & Safety Hazards

Chemicals

Slippery Floors / Tripping

Food Safety

Wash and dry hands **after** performing this task

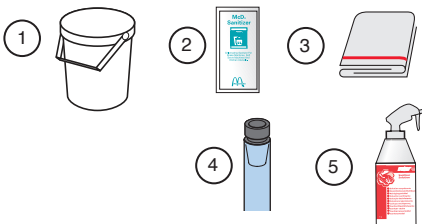

Ensure nuts, bolts & screws are tight

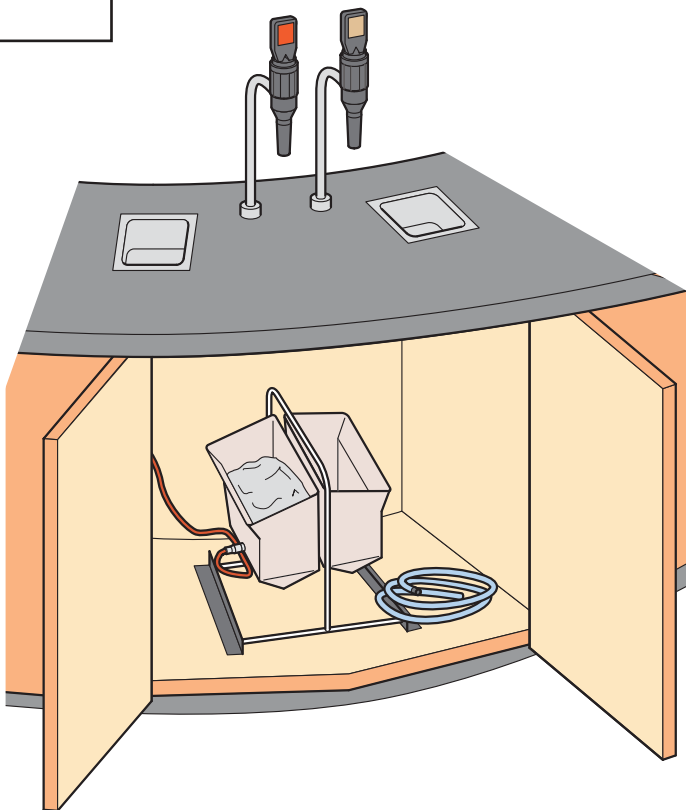

Inspect equipment. Do not use if damaged

Equipment

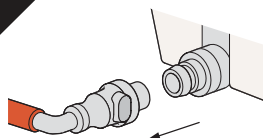

- 1 Shake Mix Bucket
- 2 McD Sanitiser
- 3 Red Border Cloth
- 4 Tap Cleaning Hose
- 5 McD Surface Sanitiser

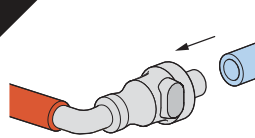

NB Regular cleaning is essential to the smooth and successful operation of the Dispense System.

1

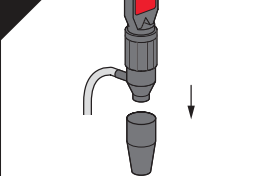

Disconnect the Sauce Bag.

2

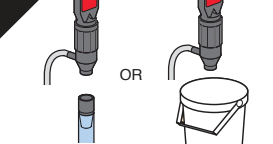

Attach clean-in-place Hose to the Bag Connector going to the Sauce Pump.

3

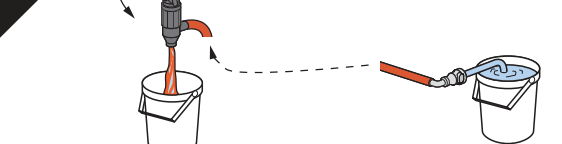

Remove the Spout from the Tap.

4

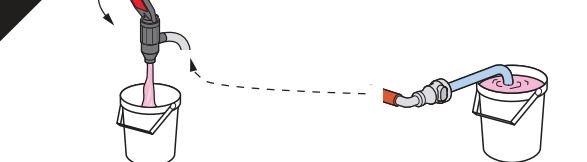

Connect the Hose onto the Tap or place a bucket under the Tap.

5

Insert end of clean-in-place Hose into bucket of warm (not hot) water and operate system to flush out Sauce via the Hose connected to the tap or direct into an empty bucket.

6

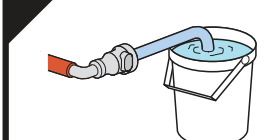

Repeat step 6. Mix 9.5 litres of lukewarm water with one packet of McD Sanitiser.

7

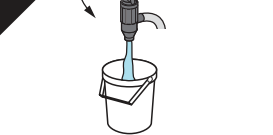

Leave Sanitising Solution in the system for 2 - 3 minutes to allow the Sanitiser to reach all the internal surfaces.

8

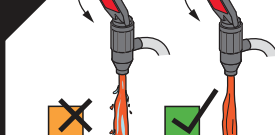

Flush through again with more warm water as in step 6, to flush out the Sanitising Solution.

9

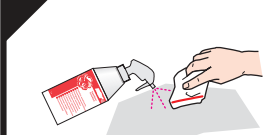

Remove clean-in-place Hose from the bucket of water and continue to operate the system to remove as much water from the line as possible.

10

Reconnect the Sauce Bag and operate the system until the sauce is dispensed without being watery.

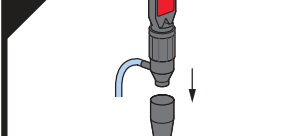

11

Wipe down all external surfaces with McD Surface Sanitiser and a Red Border Cloth.

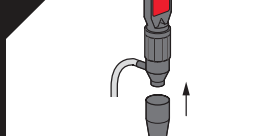

NB At the beginning of each day and during periods of infrequent use operate system to ensure that Sauce is dispensed smoothly without spluttering. It may be necessary to wipe the nozzle outlet to remove sauce residue. Carrying out this procedure together with regular internal cleaning will ensure continued smooth operation of the system.

12

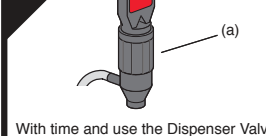

At the end of each day's trading remove Spout from the Tap and wash clean in warm water.

13

Refit taking great care not to cross thread. Tighten Spout to finger tight. DO NOT over tighten.

14

With time and use the Dispenser Valve, the Acorn Nut (a) may work loose. To prevent this tighten the Acorn Nut each time you perform the Spout Cleaning Operation.
