Towels

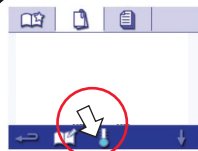

NOTE:

1. For best results complete all steps of the cleaning procedures every 24 hours.
2. Do not wipe internal surfaces when in use as this will remove the KOTE Soil Shield layer.

MerryChef Ovens

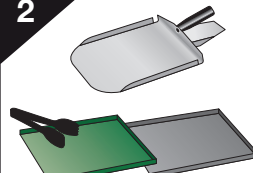

1

Select the blue thermometer symbol to disable heating and start the cooling cycle.

2

Remove the paddles, Teflon trays and tongs. Take to back sinks for 4-step cleaning.

3

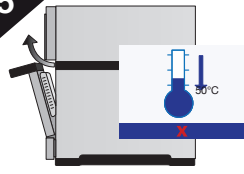

Fill the Cool Down Pan to just above the inner groove and place into the oven cavity on the cook plate.

4

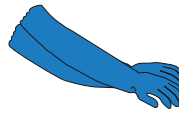

Select the Tick symbol to continue.

5

Open the door slightly to speed up the cooling process. Oven cooling takes approximately 20 minutes

6

Put on long gauntlets.

7

Once the oven reaches 50°C, remove the cool down pan and discard the water in the sink.

WARNING: The pan and oven will be warm.

8

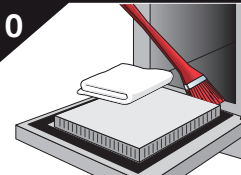

The oven is now ready for cleaning.

9

Remove the cook plate. Spray cook plate with KAY Super Contact Cleaner, pay attention to areas of carbon build up. Leave to stand for 5 minutes.

10

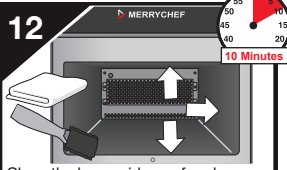

Remove any food particles from between oven floor and inside of the front door, using a clean, sanitised, grill cloth and a red toaster brush.

11

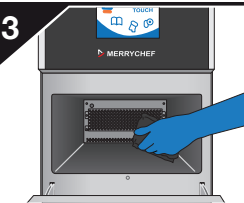

Spray KAY Super Contact Cleaner onto the multi use tool pad or grill cloth. **WARNING:** Do not spray directly into the cavity.

12

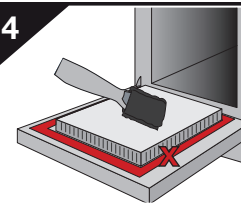

Clean the base, side, roof and rear surfaces of the cavity. For difficult areas leave KAY Super Contact Cleaner to soak for 10 minutes with the oven door open.

13

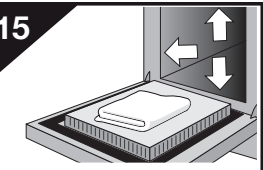

Remove pad from paddle for hard to reach areas.

14

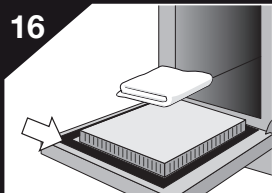

Clean inside surface of the door. **WARNING:** Do not clean the door seal with the pad.

15

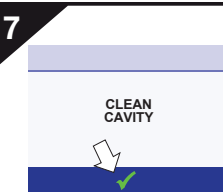

Wash off all surfaces using a clean, sanitised, grill cloth. Ensure all traces of KAY Super Contact Cleaner are removed.

16

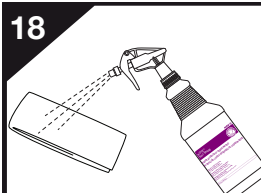

Wipe door seal with a clean, sanitised grill cloth. Dry all surfaces using kitchen roll.

17

Select the Tick symbol to continue.

18

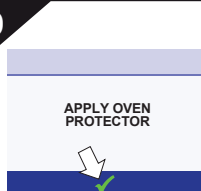

Fold 3 pieces of towel and apply 3 sprays of KOTE Soil Shield to the towel.

19

Apply KOTE Soil Shield to the base, side and rear surfaces of the cavity. Repeat step 18 and apply to the inside surface of the door. Repeat step 18 as needed to apply a good covering. **WARNING:** Do not apply to the door seal, roof or cook plate. Remove excess with clean grill cloth.

20

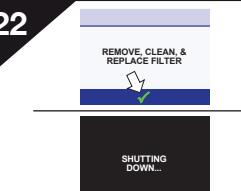

Select the Tick symbol to continue.

21

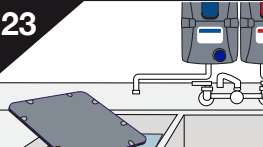

Tilt faceplate downwards, remove air filter and clean with a clean, sanitised, grill cloth. Re-install the air filter and close faceplate.

22

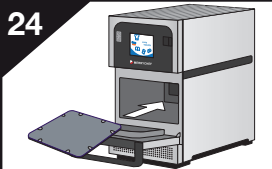

Select the Tick symbol to continue. The oven will now switch off.

23

Scrub cook plate with Multi Use Tool Pad, apply more KAY Super Contact Cleaner as needed. Clean cook plate using the 4-step method.

24

Re-install cook plate.

25

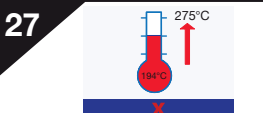

If the oven is not going to be used, turn it off.

26

Clean the outside of the oven with KAY Multi-Surface & Glass Cleaner Solution and a sanitised cloth.

27

If the oven is to be put back in use, turn the oven on (I). The oven in about 20 minutes will heat up to 275°C. During this time the KOTE Solid Shield will cure and the oven will be ready to use once the menu appears.
