Sand

Note: Purchase sand locally as required

Spill Procedure

- for oil / diesel spilled
in car park area

Place traffic cones around
the affected area.

**Ensure no oil / diesel
enters any of the car
park drains.**

Follow procedures below
depending on size /
amount of spill.

Small spills

- spills up to approx.
30cm diameter.

1

Use kitchen roll to soak up
as much of the spill as
possible.

2

Place all contaminated
kitchen roll in a bin liner
and seal the bin liner.

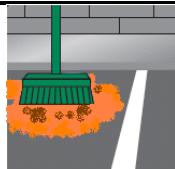

3

Dispose of bin liner in
normal waste.

Medium spills

- spills up to approx.
1m diameter.

1

Apply sand to the area.
Allow the sand to absorb
the spill.

2

Sweep up the sand and
place it in heavy-duty bin
liners.
Repeat procedure if
necessary

3

Do not over-fill the bin
liners.
Call your waste collection
company to arrange
collection of the bags.

Large spills

- spills over approx.
1m diameter

1

It may be necessary to
close a section or all of the
car park for safety and to
prevent spills from
spreading.

An external cleaning
company may be required.

2

The Environment Agency
and Fire Brigade will be
able to assist with very
large spills.

**Inform the Police if any
public roads have been
affected.**

After initial action

1

Refer to the cleaning card
"Car Parks & Drive Thru
Lanes – detail clean" to
clean the area once the
spillage has been removed
